

Jesus Andres Cisneros Zarate

| DevOps | CloudOps | SRE | Network Engineer |  Guadalajara, Jalisco.

PROFILE

 andres2cz22@gmail.com

 : +52 3931061665

 <https://www.linkedin.com/in/jesus-andres-cisneros-zarate-361407149/>

 <https://github.com/Fearthe5G>

Soft Skills

- ° Effective Communication.
- ° Solution-Oriented Mindset.
- ° Resilience Under Pressure.
- ° Creativity and Innovation.
- ° Team Collaboration.
- ° Continuous Learning.

Hard Skills

- ° DevOps | SRE.
- ° Cloud engineer.
- ° System engineer.
- ° Python Developer.
- ° Data Analyst.
- ° Network engineer.

° English : C1

Education

August 2009 – May 2015

CENTRO UNIVERSITARIO DE LA
CIÉNEGA

“Computer engineer”

Av. Universidad, Núm.1115, Col. Linda
vista, Ocotlán, Jalisco. México

CERTIFICATES

PYTHON TOTAL (UDEMY)

No.cert: UC-52f18e0a-e89c-469e-8e83-14bec24dbdcb

LOOKER STUDIO(UDEMY)No.cert:UC-6022739a-b559-4b6b-790a-e6bfdf1e5e1

TERRAFORM (UDEMY)

No.cert:UC-2776f27a-f902-4829-a2b6-75b4e2716885

DevOps TOTAL (UDEMY)

No.cert:UC-387a724b-e2d1-44d1-8301-e807101af06d

Azure DevOps(UDEMY)

No.cert: UC-eb20b7ce-1b2b-4a6e-903a-f817c0bc9141

EXPERIENCE

SUMMARY

DevOps Engineer with strong expertise in Cloud, Networking, and Automation, with over 9 years of hands-on experience implementing CI/CD pipelines, containerized deployments, and Infrastructure as Code (IaC) in AWS, GCP, and Azure environments. Skilled at cost optimization, system resilience, reliability and process improvement, with a proactive and solution-oriented mindset.

LKLPAY

DevOps/SRE. April 2025 -- DEEMBER 2025.

- Deploying IAC with terraform for AWS.
- Deploying EC2, VPC, VPN, Security Groups ETC on AWS.
- Documentation and tracking of our infrastructure.
- Troubleshoot networking and application issues across production systems.
- Project plans and optimization costs. Improvement plans for infrastructure.
- Built and maintained CI/CD pipelines using Jenkins, Azure DevOps and Docker for automated deployments.
- Designed, configured, and managed Kubernetes clusters (EKS on AWS and AKS on Azure) for micro services based applications.
- Integrated Azure DevOps suite for project management, repos, pipelines, and artifacts to support deployments in Azure Cloud.
- Implemented containerization strategies with Docker, including image repositories, Azure pipelines and Azure Artifacts feeds.
- Monitoring with Graphana.
- Filed Documentation for infraestructures, architecture and construction.

Tools used in this project:

AWS, Linux-Mint, Ubuntu, Azure DevOps, EKS, AKS, Kubernetes, Docker compose, GitHub, Terraform, Ansible, Docker, PM2, Go, Konsole Shell, Python, Chat GPT, Jira, Slack, SonarQube, Kafka, VPC, VPN, Security Groups, UFW.

TRACTOSOL

DATA ANALYST. DEC 2024 MAR 2025

- Data a<https://www.facebook.com/share/v/19PupuaXRn/nalysis>.
- Cleaning and Scrubbing data from original files
- Parsing information to accurate formats
- Loading information to Cloud
- Creating datasets, and tables on BigQuery(GCP)
- Creating looker studio Dashboards to stakeholders

Tools used in this project:

Looker studio, LookML, SQL, Mysql server, BigQuery, GCP console, G-Docs, G-meet, , Python, Excell, Google DataSheets, Json.

Personal proyects: Nov 2023 Nov 2024

PYTHON TOTAL (UDEMY)

No.cert: UC-52f18e0a-e89c-469e-8e83-14bec24dbdcb

Technologies

DevOps Skills

- CI/CD pipelines design & automation (Jenkins, GitHub Actions, GitLab CI, Azure Pipelines).
- Version control & collaboration: Git, GitHub, GitLab, Bitbucket.
- Infrastructure as Code (Terraform, Terraform Cloud, Terragrunt, AWS CloudFormation).
- Cloud platforms: AWS, Azure (Certified), Google Cloud Platform (GCP).
- Containerization & orchestration: Docker, Kubernetes, Helm, EKS, AKS.
- Configuration management: Ansible, Puppet, Chef.
- Scripting & automation: Python, Bash, PowerShell, UiPath (RPA).
- Monitoring & logging: Prometheus, Grafana, ELK Stack, Datadog, Splunk.
- Security & compliance: Vault, SSO, IAM policies, DevSecOps, SonarQube.
- Collaboration & planning: Jira, confluence, Azure Boards.
- Azure DevOps: pipelines, repos, artifacts.
- Ansible.

SRE (Site Reliability Engineering) Skills

- Incident response & root cause analysis (Opsgenie, PagerDuty, Slack integrations).
- Service reliability & observability, (Prometheus, Grafana, New Relic, Dynatrace).
- Defining and tracking SLA, SLO, and SLI metrics for uptime, latency, and availability.
- Automated deployment and rollback strategies (Blue/Green, Canary, Rolling updates).
- High-availability & disaster recovery design across AWS, Azure, and GCP.
- Performance tuning and capacity planning in Kubernetes and Docker clusters.
- Log management & analysis (Elastic Stack / ELK, Fluentd, CloudWatch, Azure Monitor).
- Infrastructure monitoring and alerting (Datadog, CloudWatch, Prometheus AlertManager).
- Error budget management and reliability risk assessment.
- Reliability testing and chaos engineering (Gremlin, LitmusChaos).
- Continuous improvement through automation, scalability, and fault tolerance practices.
- Lambda.

Cloud:

- Google Cloud, AWS, Digital Ocean, SoftLayer, Microsoft Azure, IBM Cloud.
- GCP:** App Engine, APIs, IAM Compute Engine, GKE, VPC, Big Query, Cloud Run, Buckets, Load Balancers.
- DNS, Domains, Subnets, Firewall.
- AWS:** EC2, VPC, IAM, S3, DynamoDB, Lambda.
- Azure:** Azure DevOps. Repos, pipelines, artifacts, Boards.
- ADD, ARM, VMs, Vnet, ACR, AKS, NSG.

Google - EPAM

CHRONICLE SDN Telemetry (SIEM – SOAR). May 2023 Oct 2023

- Main focus in Chronicle GCP original product.
- Tickets and trouble-shooting Chronicle logs, Alerts, Reports, Dashboards, Feeds, LogTypes. All related to monitoring and telemetry.
- Parsing and triaging Raw logs to different encoding languages such like python, Yara -L, JSON, YAML.
- Automated tasks with scripts to support GCP environments under DevOps practices.

Tools used in this project:

Chronicle by Google, Looker Dashboards by Google, GCP console, G-Docs, G-meet, Gmail, Python, Yara-L, Json, Yaml.

Google - Infosys

Cloud Engineer Support. April 2021 -Feb 2023

- Trouble-shooting customers tickets and environments, networks and infrastructures.
- Debugging and fixing network issues specifically related to Google Cloud Platform (GCP) products.
- Overall assistance for GCP products and connections like: GKE, Kubernetes, Containers, VPC, VPN, Subnetting, Firewall general configurations and firewall rules, Cloud Armor (original GCP product).
- Internal/External Load Balancers, Http(s) Load Balancing.
- Domains, DNSs, Aliases, C-names, A-records and Zones implementing.
- Business intelligent strategies and analysis on Looker (original GCP product) Lookml, SQL Queries.
- Queue Manager for Looker tickets.

Tools used in this project:

GCP: IAM, Network Services, Cloud DNS, Cloud CDN, Cloud NAT, traffic director, Cloud Domains, VPC, Shared-VPC, firewall, Routes, Compute Engine, VMs, Templates, Images, Persistent Disk, Buckets, Kubernetes Engine (GKE), K8s, Clusters, Hybrid connectivity VPN, Cloud Router, Cloud Run, Datadog, Cloud Functions, Cloud Storage, Git, GitHub, Jenkins, Istio, Docker, StackDriver.

IBM

Network/Cloud Engineer. August 2018 -Feb 2021

- Managing Firewall rules and Access lists.
- Cisco ASA, Vyatta and Juniper OSI Layer 4 Firewalls Managing.
- Cloud DNS and Zones support, A – records, C-names, DNS, Proxys, VPN managing.
IP tables, routing and switching troubleshooting, VLAN, NAT, Dynamic NAT.
Trouble shooting oriented to Windows and Linux servers (Red-Hat, Debian, Ubuntu), connectivity, Routing tables, Linux files, Active Directory.

Tools used in this project:

Linux Red Hat, Linux Shell, NMAP, Telnet, Echo, Netstat, TCP-DUMP, Power Shell, Bash, Python, Traceroute, Wireshark, C-wing.
Firewall, ASA CISCO, Junos Juniper, Vyatta by AT&T.
Grafana, Prometheus, Magnum, IBM Cloud, VmWare, Active Directory, Vsphere, Remote Desktop Connection.

Network:

-Trouble-Shooting: OSI Layers 2, 3, 4.
TCP/IPv4/IPv6, L2/L3 Switches, Routers, Firewalls, Appliances.
-Firewall rules: ASA, Juniper, Vyatta, Untangle.
-Pen-testing: NMAP, Zen-map, Traceroute, Ping/Hping, TCPDump, T-shark, Wireshark, Netstat, IPsec, DDoS, AAA.
-Network devices: Cisco, Juniper, At&t, UPS.
- Network designer: VLSM,CIDR, Subnetting, VLANs, ACLs, NAT, Trunking, STP, LAN/WAN, LACP, VXLAN, Gateway, TACACS+/RADIUS, Tunnels Spanning-Tree, VPN, GETVPN.
-Routing protocols: RIPv2, EIGRP, IGRP, OSPF, IS-IS, BGP, IGP, SNMP,
-Network services: SSH, TELNET, FTP, HTTP, HTTPS, SSL, TLS, ARP, BFD, LACP, LDAP, RSTP, DNS, TCP/IP, IPv4/IPV6, DHCP, TCP/IP, NTP, SYSLOG, IPSEC, REST.
-Network monitoring: SMARTs EMC, OPManger, NetQos, Netvoya, SolarWinds, Grafana, Nagios, WatchDog.
-Basics Cisco SASD, CUCM (collaboration).

SysAdmin:

-Unix server: Unix Debian servers.
-Linux Ubuntu, RedHat,
-Linux shell, scripting, vim, bash
-Windows Server: Active Directory.
- Hypervisors: Virtual Box, Vmware Vsphere, GNS3 AWS EC2, GCP Compute Engine.

Data Analyst:

-Looker studio and Looker by Google.
- SQL.
-BigQuery (GCP).
-Excell.

Management:

-ServiceNow, Remedy, ManageEngine, and Jira Service Management for ITSM and ticket life cycle management.
-Confluence for documentation, change control, and knowledge base creation.
-Azure DevOps Boards for agile sprint planning, backlog tracking, and workflow automation.
-Definition and monitoring of SLA, SLO, and SLI metrics aligned with reliability goals.
-Opsgenie and PagerDuty for incident management, escalation, and real-time communication.
-GitHub Projects and GitLab Issues for project visibility and team collaboration.
-Slack and Microsoft Teams integration for alerting and operational coordination.
-Experience applying Agile, Scrum, and Kanban methodologies for continuous delivery and cross-team alignment.
-KPI and performance metric tracking for service reliability and process improvement.

Alorica

Customer Service Agent. October 2017 -August 2018

UDG CUNORTE

Professor-August 2016 - February 2017

- Teaching next signatures:
- Java encoding L1.
- Micro-electronics.

Tata Consultancy Services

Network Engineer. August 2015 – August 2016

- Handling L1 tickets (Read only and informative roll).
- Handling L1 Change request, high severity incidents.
- Monitoring the queue using Smarts EMC tool for network (L1).
- Performing Trouble-shooting for Tickets, INCs, and Remedy requests.
- Performing data collection on Sybase databases (UNIX).
- Managing switch/routing, reach ability and accessibility reports based on Cisco environments. BGP, TCP/IP, ICMP, EIGRP, network connections.
- Ownership in Hand over report for next geography. Daily Report and on-call.

Tools used in this project:

Routers and switches by Cisco, Service now, Smarts by EMC, SolarWinds, PING, HPING, Trace-route, ZEN-MAP. Office
